Alias|Wavefront Announces Free Public Beta of mental ray for Maya version 1.5

version 1.5 to simplify usability and incorporate additional Maya feature support; mental images and Alias|Wavefront focus on tighter integration of their technologies

San Antonio – Siggraph (booth 13085) – July 22, 2002 – Alias|Wavefront™, an SGI (NYSE: SGI) company, today announced that it will release a free public beta version of its new mental ray® for Maya® version 1.5 rendering solution in late summer, 2002. mental ray for Maya 1.5, conjointly developed by Alias|Wavefront and mental images®, will provide Maya 4.5 software users on all supported platforms with a tightly integrated rendering solution that maximizes the strength of both products. Version 1.5 will advance the first iteration of the technology with further simplified usability and additional support for Maya features new to Maya 4.5.

“Our strategic alliance with mental images is changing the face of CG,” states Alias|Wavefront, VP of Product Development, Peter Mehlstaeubler. “The majority of our large film customers are either using or evaluating this product at present. Working side-by-side with mental images, we will astound our users with the production-proven, tightly integrated, rendering solution that mental ray for Maya 1.5 provides. Particularly exciting is the fact that we will be delivering the first mental ray rendering solution, with GUI, to the Macintosh community.”

“mental images shares Alias|Wavefront's vision to make high quality 3D graphics content creation tools much more widely accessible,” states mental images President and Director R&D, Rolf Herken. “As part of that same vision, we continue to be 100% committed to meeting the demands of those visual effects and film production facilities, such as ESC Entertainment, who are breaking new ground in the visual effects arena. Our expanding partnership with Alias allows us to innovate faster to satisfy the needs of the world’s leading film directors, visual effects artists and technology specialists.”

-more-
mental ray for Maya

mental ray for Maya version 1.5 is an optional and fully integrated plug-in renderer for Maya 4.5 that offers the features and tools available in mental images’ new mental ray renderer, mental ray 3.1. The technology, developed to satisfy numerous customer requests, first became available in December 2001 bringing advanced effects such as global illumination and motion-blurred reflections to Maya users. The second iteration of the product will support functionality new to the soon-to-be-released Maya 4.5, including volume lighting and rendering, particle instancing and the Maya Fluid Effects™ Ocean Shader feature.

“The integration of Maya and mental ray is a milestone development that has combined the world’s most powerful 3D modeling and animation application with the world’s most advanced 3D renderer,” states George Borshukov, VFX technology supervisor for ESC Entertainment. “This combination is essential in allowing us to create massive, fully computer generated sequences that are completely photorealistic and could stand up side to side with live action footage. True virtual cinematography is on its way!”

Pricing and Availability

mental ray for Maya version 1.5, will be available to licensed Maya 4.5 users as a free, public beta version plug-in for the Windows®, IRIX® and Linux® operating systems, late this summer. The Mac® OS X version will become available shortly thereafter. The beta offering, will be downloadable from http://www.aliaswavefront.com.
